Online Banking & Google Invisible reCAPTCHA 2

Our effortless Online Banking login knows when to be easy on people and hard on bots. Armed with state-of-the-art security and technology, Google Invisible reCAPTCHA 2 lets human users pass through login validation seamlessly without seeing the “I’m not a robot” checkbox, while suspicious logins and bots have to complete the challenges presented. (Most valid user login attempts pass validation with no need for this step.)

Possible reCAPTCHA INTERRUPTIONS WITH AGGREGATOR SERVICES

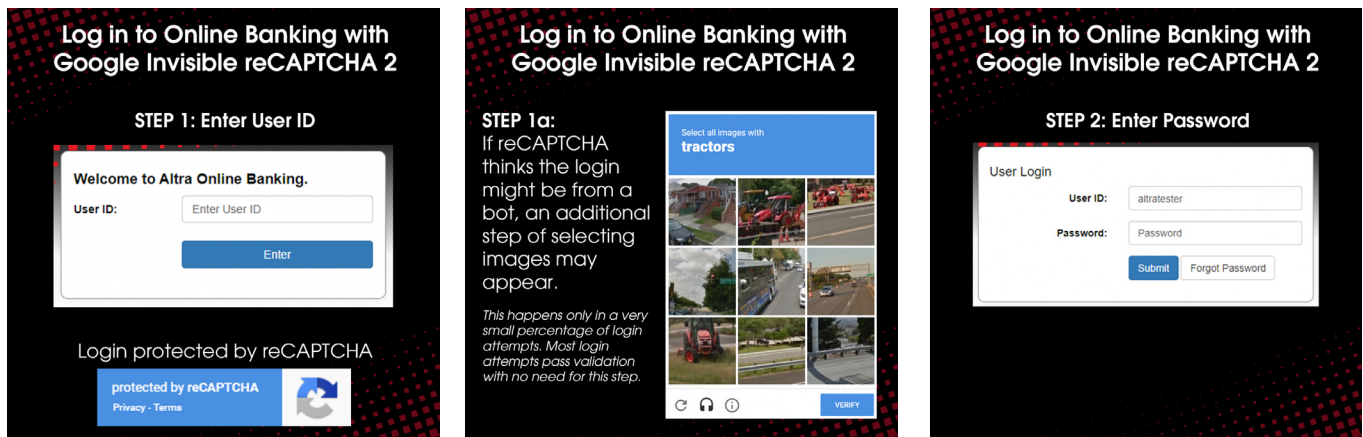

Altra is aware that reCAPTCHA may interrupt service with some aggregators. While some large providers are able to program the ability to skip reCAPTCHA, smaller companies may not. Unfortunately, neither Altra nor online providers are able to control this accessibility. We recommend reaching out to your aggregator provider to remind them of your programming needs.

LOG IN TO ONLINE BANKING WITH reCAPTCHA

1. Click the Login button on Altra.org

2. Follow the steps displayed in the reCAPTCHA screens.

3. You will now be prompted with your Security Challenge questions, if applicable.
